

EXORAYS RISK DISCLOSURE NOTICE

Before engaging in online cryptocurrency and CFD trading on the Exorays platform (referred to as the "Website"), it is important that you carefully read and understand the risks involved. Trading cryptocurrencies and CFDs involves significant financial risk, and you should only trade with funds that you can afford to lose. This Risk Disclosure Notice highlights the key risks associated with trading on our platform. By using our Website, you acknowledge and accept the risks described below.

MARKET VOLATILITY

Cryptocurrency and CFD markets are highly volatile and subject to rapid price fluctuations. The value of cryptocurrencies and CFDs can rise or fall dramatically within short periods. Volatility can be caused by various factors, including market demand, economic events, regulatory developments, and investor sentiment. Price fluctuations can result in significant gains or losses, and there is no guarantee of profit.

LEVERAGE AND MARGIN TRADING

Exorays offers leverage and margin trading, which allows you to trade larger positions with a smaller amount of capital. While leverage can amplify potential profits, it also magnifies potential losses. If the market moves against your position, you may be required to deposit additional funds to maintain your position or risk liquidation. Trading on leverage carries a high level of risk, and you should fully understand the implications before using leverage.

LIQUIDITY RISKS

Cryptocurrency and CFD markets may experience periods of low liquidity, especially during off-market hours or during volatile market conditions. Low liquidity can result in increased bid-ask spreads, slippage, and difficulty in executing trades at desired prices. It is important to consider liquidity risks when placing trades, as it may impact your ability to enter or exit positions.

CRYPTO ASSET RISKS

Trading cryptocurrencies carries unique risks that differ from traditional financial assets. Cryptocurrencies are decentralized digital assets and are not backed by any government or central authority. Their value is based on market demand and can be influenced by various factors, including technological developments, regulatory changes, security breaches, and market perception. Cryptocurrencies may also be subject to hacking, theft, and fraud risks.

REGULATORY RISKS

The regulatory landscape surrounding cryptocurrencies and CFDs is evolving and can vary significantly across jurisdictions. Regulatory changes or actions may impact the legality, availability, or trading conditions of cryptocurrencies and CFDs. It is your responsibility to understand and comply with the laws and regulations applicable to your jurisdiction.

TECHNOLOGICAL RISKS

Trading cryptocurrencies and CFDs relies on technological infrastructure, including internet connectivity, trading platforms, and digital wallets. Technical issues, system failures, cyber-attacks, or other disruptions can impact your ability to access the platform, execute trades, or access your funds. It is important to take appropriate security measures, such as using strong passwords and safeguarding your login credentials.

INFORMATION AND EDUCATIONAL MATERIALS

The information and educational materials provided on the Exorays platform are for general informational purposes only and should not be considered as financial advice or a recommendation to trade. It is your responsibility to conduct your own research, analysis, and due diligence before making any trading decisions. Trading based on incomplete or inaccurate information may result in financial losses.

LOSS OF CAPITAL

Trading cryptocurrencies and CFDs involves the risk of losing your entire investment capital. It is possible to incur substantial losses that exceed your initial investment. You should carefully consider your risk tolerance and financial situation before engaging in trading activities.

PAST PERFORMANCE DOES NOT GUARANTEE FUTURE RESULTS

Past performance of cryptocurrencies or CFDs is not indicative of future results. Historical price movements or performance data should not be relied upon as a guarantee of future performance.

INDEPENDENT PROFESSIONAL ADVICE

It is recommended that you seek independent professional advice, such as from a financial advisor or legal expert, before engaging in cryptocurrency and CFD trading. Professional advice can help you understand the risks, assess your investment objectives, and make informed trading decisions.

ACCEPTANCE OF RISKS

By using the Exorays platform, you acknowledge and accept the risks associated with trading cryptocurrencies and CFDs. You understand that trading involves the potential for financial loss and that you are solely responsible for your trading decisions.

Please note that this Risk Disclosure Notice is not exhaustive and does not cover all potential risks. It is your responsibility to stay informed, assess your risk tolerance, and make informed trading decisions.

If you have any questions or concerns regarding the risks associated with trading on the Exorays platform, please contact our customer support team for assistance.
